This one is in "English" and got me working in 5 minutes Thank you very much! The driver is almost always there on the file
system so there is no need to download it.. I'm not sure if this is on account of me not having internet in ubuntu or what If this is
the problem, then can someone please give me a file so I can install build-essentials? I've tried so hard to get this to work and
nothing seems to be working.. I thought that with the release of Lucid that a lot of problems would clear up by themselves (this
was the case with my laptop).. 4 0 1/os/linux/ / /common/cmm_mac_usb c: In function 'RTMPAllocTxRxRingMemory':
